Careful: Passes good personal judgment and is aware aftensive (interrupting, giving excuses).	co-toe physical examination. completes a through written patient not and adjusts behavior/performance. Fork faster/better. ys attention to detail of skills, document of limitations and strengths. eccessarily performed the entire intervie	arrative. Tation, patient comfort, set-up w or physical exam, but rather	

action was initiated/performed that endangered the physical or psychological safety of the patient, bystanders, other responders or crew. (Preceptors

should not agree to a "successful" rating unless it is truly deserved. As a general rule, more unsuccessful attempts indicate willingness to try and are better than no attempt at all.)

Ratings: NA = Not applicable - not needed or expected; this is a neutral rating. (Example: Student expected to only observe, or the patient did not need intervention). 0 = Unsuccessful - required excessive or critical prompting; includes "Not attempted" when student was expected to try; this is an unsatisfactory rating. 1 = Marginal - inconsistent, not yet competent; this includes partial attempts. 2 = Successful/competent - no prompting. Note: Ideally, students will progress their role from observation to participation in simple skills, to more complex assessments and formulating treatment plans. Students will progress at different rates as case difficulty will vary. Students should be active and ATTEMPT to perform skills and assess/treat patients early even if this results in frequent prompting and unsuccessful ratings. Unsuccessful ratings are normal and expected in the early stages of the clinical learning process when student needs prompting. Improvement plans MUST follow any unsuccessful or inconsistent ratings.
